

EG PRO 730 ECOVISTA HUMID

EUROGRASS Pro Landscaping

A resilient grass mixture designed for heavily used areas with variable moisture levels

RSM 7.3

Profile

For traffic routes and extensively used and/or maintained areas in public and private green spaces in locations with a risk of waterlogging. This grass mixture is particularly resistant to changing moisture conditions and forms a dense, stable sward. Thanks to its deep-rooting and adaptable species, it contributes to soil stabilization and ecological enhancement.

- Developed for traffic routes and extensively used areas
- Ideal for locations with risk of waterlogging
- Highly resistant to fluctuating moisture conditions
- Forms a dense and stable sward
- Contains deep-rooting and adaptable grass species
- Contributes to soil stabilization
- Supports ecological enhancement and sustainability
- Durable under regular use and challenging site conditions
