

EG PRO 712 SCENICGREEN & HERBS

EUROGRASS Pro Landscaping

The mixture's robust and resistant structure is characterised by its nutrient and water requirements, which are similar to those of EG PRO 711 and herbs that have been added.

RSM 7.1.2

Profile

The mixture is characterized by a robust and resistant structure in terms of nutrient and water requirements. It is suitable for extremely dry locations such as south-facing embankments. The main areas of application are extensive and/or manicured areas in public and private green spaces. The maintenance requirements are low; this mixture does well with just a few cuts per year (0-3). Reduced cutting intensity promotes the proportion of herbs in the stand.

- Features a robust and resilient structure
- Low nutrient and water requirements
- Requires only 0–3 cuts per year
- Suitable for extensive and semi-manicured areas
- Reduced mowing encourages a higher proportion of herbs in the sward
- Promotes a natural, diverse, and sustainable vegetation cover
