

BIANCA

TRIFOLIUM REPENS

Profile

The white clover BIANCA belongs to the intermediate maturity segment and has medium large leaves. BIANCA scores with a good sward density and crude protein content. The yield level of the variety is worth mentioned, because of the good dry matter yield especially in the following cuts.

National listing/Official recommendation:

BY, DE, FR

Sowing rate: 10-12 kg/ha

- ✓ medium leaf size
- ✓ very productive
- ✓ good winter hardiness
