

SHERLOCK

LOLIUM PERENNE

Profile

SHERLOCK is a tetraploid late Perennial ryegrass. The variety provides high stable yields while being highly persistent and soil-covering, even on difficult locations such as peat soils. A very good rust resistance and the outstanding low tendency to form inflorescences in the aftermath, ensures perfect forage quality. The Belgian recommendation "Fourrages Mieux" rated SHERLOCK 109% overall with especially good values for vigor and grazing suitability.

National listing/Official recommendation:

BE, CA, DE

Sowing rate: 40 kg/ha

- ✓ high and well-balanced yields
- ✓ very low tendency to form inflorescences in the aftermath
- ✓ peat soil suitability

Suitability

Ploidy

tetraploid

Maturity

late to very late

Peat-soil suitability
