

TERRALIFE® - EARLYSUMMER

Ideal for early sowing dates

Profile

The demand for mixtures that tolerate heat and early sowing dates is growing. EarlySummer is ideal for early sowing dates and prefers to grow under warm conditions. The potential for seed formation is low. It's balanced composition makes it suitable for many crop rotations. Sorghum, phacelia and niger provide biomass formation, oil flax grows in deeper soil layers and sparrow clover appeals to the soil as a legume.

- ✓ Crop rotation neutral
- ✓ Also for dry conditions
- ✓ Suitable for early sowing

N-Potential approx. 60 kg/ha

Components

0%	Cruciferous
20.8%	Legumes
	Linseed, Niger, Sorghum, Sparrow clover, Phacelia

Sowing pattern

blank seed, mulch sowing, direct sowing, spreader device on tillage implement, drone

Crop rotations

Legumes *, Sugar beet *, Cereals, Maize, Oilseed rape

* Observe crop rotation diseases.

Cultivation notes

Sowing rate	20 - 30 kg/ha
Sowing time	from end of June to middle of August
Usage	Cover crop, summer intercrop, green fertilization, early sowing, N-Potential: approx. 60 kg/ha, medium to low proportion of legumes
