

MOVANNA

S 220 | CA. K 210

Profile

MOVANNA is an high yielding forage maize with good silage yields in UK, NL, DK and DE. Significant for this variety are the high starch yields combined with a visible flint/dent corn, what makes the variety an ideal forage maize for grass based feeding rations.

- ✓ High starch yields
- ✓ Good cold tolerance
- ✓ Very good practical experience in organic farming

General

Usage	 
Silo maturity	early
Grain maturity	early
Maturity forage	220
Maturity grain	ca. 210
Type of grain	intermediate
Hybrid	Single-cross
Sowing date	

Breeder classification: +++ = very good / very high | ++ = good / high | + = medium

Resistance to diseases

Maize smut	<div> <div></div> <div></div> <div></div> </div>
Helminthosporium	<div> <div></div> <div></div> <div></div> </div>

Location

Three horizontal sliders are shown, each with a green bar and a green checkmark icon. The sliders are labeled 'Limited areas', 'Soil type', and 'Humidity'. The 'Limited areas' slider has a green bar extending from the left to the right, with a green checkmark icon at the right end. The 'Soil type' slider has a green bar extending from the left to the right, with a green checkmark icon at the right end. The 'Humidity' slider has a green bar extending from the left to the right, with a green checkmark icon at the right end.

Sowing

Forage	8 - 11 Plants/m ²
