

POLLANUM

LOLIUM WESTERWOLDICUM

Profile

POLLANUM is a proven Annual ryegrass with a high dry matter yield in the first cut. The variety can be used as a main crop and as an intercrop; it produces high yields under both systems. Other characteristics of POLLANUM are a fast development and a high vigour. It is well adapted to various ecological conditions and used from the north to the south of Europe.

National listing/Official recommendation:

AR, BY, DE, EC, ES, FI, KZ, LU, PT, RU, TR, UA, UK

Sowing rate: 40-50 kg/ha

- ✓ suitable for inter- and maincropping
- ✓ proven variety with good DM yields
- ✓ rapid youth growth and high vitality

Suitability

Ploidy

tetraploid

Maturity

inter

Yield characteristics

Intercropping - Dry matter yield 1st cut		medium to high
Dry matter yield total		medium to high
Dry matter yield - 1st cut		medium
Dry matter yield - further cuts		medium

Plant stand development

Intercropping - Early growth development		strong
Early growth development		medium to strong

Healthiness

Susceptibility to rust		low to medium
