

COUNTRY F 2051

Without clover, 1-2 years

Mixture for annual field forage growing for 1-2 years on medium to good sites

Profile

This mixture achieves high yields with intensive use, especially in the 1st cut, even before maize. In addition to the good utilisation of winter moisture, the regrowth capacity as well as the yield distribution of the further cuts is balanced. The Hybrid ryegrass makes a second main crop year possible and is responsible for high yields and stability. The mixture produces well structured grass for optimal silage production.

- ✓ For intensive use
- ✓ Good utilization of winter moisture
- ✓ Suitable before maize growing

Components

85%	Italian ryegrass Dolomit*, Dorike*, Kingsgreen*, Lipsos*
15%	Lolium hybridum AstonCrusader, Pirol

If individual varieties are not available, they are replaced by equivalent ones. *Also suitable for intercropping because the yield in the first cut is above average.

Locations

Dry	
Normal	
Wet	
Peat Soil	
Altitude	

+++ = highly suitable | ++ = suitable | + = conditionally suitable | - = not given

Cultivation notes

Sowing rate	40 - 45 kg/ha
New sowing	40 - 45 kg/ha
Usage per year	4 - 6
