

## **Profile**

The fast growing and high yielding intercropping clovergrass mixture for intensive use includes Persian clover which is responsible for a high protein content. The use of Annual ryegrass-varieties for main and intercrop forage cultivation makes the mixture flexible to use.

- ✓ Fast growing mixture
- ✓ For intensive use
- ✓ With Persian clover

## Components

| 80% | Lolium westerwoldicum<br>Arnoldo*, Falladino*, Alberto |
|-----|--|
| 20% | Persian clover<br>Resal                                |

If individual varieties are not available, they are replaced by equivalent ones. \*Also suitable for intercropping because the yield in the first cut is above average.

## Locations

| Dry       |  |
|-----------|--|
| Normal    |  |
| Wet       |  |
| Peat Soil |  |
| Altitude  |  |

+++ = highly suitable | ++ = suitable | + = conditionally suitable | - = not given

## **Cultivation notes**

| Sowing rate    | 40 kg/ha                       |
|----------------|--------------------------------|
| New sowing     | 40 kg/ha                       |
| Sowing time    | from March to April            |
|                | from 10. July to end of August |
| Usage per year | 1 - 2                          |
