

# COUNTRY F 2056

Alfalfa grass

Persistent alfalfa mixture for all sites where alfalfa is well suited

## Profile

Alfalfa grass mixture with high alfalfa content for a high crude protein content, secure yields and persistency on dry sites due to alfalfa mould (verticillium) resistant varieties. The selection of sugar-rich grasses ensures ensilability. Meadow fescue is very well suited to combine with alfalfa, as it improves the protein/energy ratio of the growing grass.

- ✓ High yield and protein content on dry areas
- ✓ Alfalfa mould (verticillium) resistant varieties
- ✓ Improved ensiling due to high-quality grasses

## Components

80%	Medicago sativa Dakota, Fleetwood, Fraver, Planet
15%	Festuca pratensis Schwetra
5%	Phleum pratense Aturo

If individual varieties are not available, they are replaced by equivalent ones.

## Locations

Dry	<div><div>+</div><div>+</div><div>+</div></div>

+++ = highly suitable | ++ = suitable | + = conditionally suitable | - = not given

Cultivation notes

Sowing rate	20 - 25 kg/ha	
New sowing	20 - 25 kg/ha	
Sowing time	from April to end of August	
Usage per year	3 - 4	
Usage	More than 50% legumes in the seed content
