

COUNTRY G 2010

Universal with clover

Broad site suitability for cutting and grazing

Profile

This mixture contains high percentages of Meadow fescue and Timothy for an improved winterhardiness as well as English ryegrass with peat soil suitability. The included Smooth-stalked meadow grass provides a dense sward and the white clover increases the elasticity of use.

The white clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. [DynaSeed LegumeMaxx](#) demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ Winterhardiness through Timothy and Meadow fescue
- ✓ High sward density
- ✓ White clover for N-fixation
- ✓ Peat soil suitability

Components

35%	Festuca pratensis Baltas, Liherold
20%	Lolium perenne (intermediate) Trivos
15%	Lolium perenne (early) Mirtello
15%	Phleum pratense Radde
10%	Poa pratensis Liblue
5%	Trifolium repens Bianca, Liflex

If individual varieties are not available, they are replaced by equivalent ones.
