

Profile

The use of versatile species makes this mixture winterhardy and robust, while red and white clover can be used to provide additional N fixation and protein yield. The late Lolium perenne increases the energy density in the forage.

- ✓ Combination of many grass and clover species
- ✓ Winterhard and constant yielding
- ✓ Late Lolium perenne for high energy

Components

30%	Lolium perenne (late) Hurricane, Youpi
20%	Phleum pratense Lischka
20%	Festuca pratensis Liherold, Preval
10%	Poa pratensis Liblue
5%	Dactylis glomerata Rosseur
5%	Lolium perenne (early) Karatos
5%	Trifolium repens Bianca, Liflex
5%	Trifolium pratense Milvus, Taifun

If individual varieties are not available, they are replaced by equivalent ones.

Sowing pattern

New sowing
