

COUNTRY G 2013

Hay and silage for dry sites

Intensive cutting and grazing for dry areas

Profile

The high proportions of *Dactylis glomerata* contained in this mixture ensure yields on dry sites. In combination with early and intermediate *Lolium perenne*, winter moisture is optimally utilized. Extensive management is possible due to the content of white clover.

The white clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. [DynaSeed LegumeMaxx](#) demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ Drought tolerant *Dactylis glomerata* and *Festulolium*
- ✓ *Poa pratensis* for a dense sward

Components

45%	Dactylis glomerata Revolin, Lidacta
20%	Festulolium Fedoro
10%	Lolium perenne (early) Karatos
10%	Lolium perenne (intermediate) AstonHockey
10%	Festuca rubra Rafael
5%	Trifolium repens Bianca, Liflex

If individual varieties are not available, they are replaced by equivalent ones.

Sowing pattern

New sowing

Locations
