For higher altitudes, intensive

Mixture for high use intensities and a high basic ration

Profile

Mixture for intensive use with broad site suitability, especially at higher altitudes. Winterhardy species and varieties ensure high cultivation safety and have special recommendation for southern Germany. The white clover fixes atmospheric nitrogen and increases the elasticity of use.

The white clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. [DynaSeed LegumeMaxx](#) demonstrably and significantly improves nitrogen fixation, root development, and thus yield.
