

# COUNTRY H 2117

Horse meadow for new sowings

Mixture for intensively used horse pastures and runs

## Profile

This mixture ensures lush green pastures with healthy forage, even where the sward is particularly stressed by sharp tread and deep browsing. It contains grass species that show intensive tillering and very good sward density. The forage grasses are adapted to the high demands of horses for tasty and healthy forage. This includes timothy in particular as it improves the feeding value and is eagerly eaten.

- ✓ For intensively used horse pastures
- ✓ High sward density
- ✓ High feeding value and yield

## Components

25%	Lolium perenne (Pasture type)
25%	Lolium perenne (intermediate)
20%	Poa pratensis
20%	Phleum pratense
10%	Festuca rubra

## Sowing pattern

New sowing

## Cultivation notes

Sowing rate	40 kg/ha
Sowing time	from March to September
Usage per year	4 - 6
