

## COUNTRY H 2118

Overseeding mixture to improve gaping old swards, very resilient due to use of turf types

Horse meadow for overseeding

### Profile

English ryegrass is particularly suitable for overseeding, as it has a very fast youth development and is very competitive. By using turf types of English ryegrass, the mixture ensures a very fast regeneration and it can tolerate the deep browsing of horses. The forage varieties provide a high yield level. Timothy improves the palatability and feeding value of the mixture.

- Overseeding mixture for horse pastures
- English ryegrass with fast youth development
- Very resilient through use of turf varieties

### Components

40%	Lolium perenne (Pasture type)
20%	Lolium perenne (early)
20%	Lolium perenne (intermediate)
20%	Phleum pratense

### Sowing pattern

Overseeding

## Cultivation notes

<b>Sowing rate</b>	20 - 25 kg/ha
<b>Overseeding</b>	20 - 25 kg/ha
<b>Overseeding, several times per year</b>	5 - 7 kg/ha
<b>Sowing time</b>	from March to September
<b>Usage per year</b>	4 - 6
