

COUNTRY GRASSLAND 2473 ORGANIC

HerbCloverGrass MultiLife

Profile

COUNTRY Grassland 2473 MultiLife is characterised by a broad site suitability as well as high yields and qualities under difficult conditions. A high energy density results from the medium and late Perennial ryegrasses. Herbs and legumes stabilise the mixture, especially in dry conditions. Furthermore the use of chicory and plantain has a positive effect on palatability and nutrient supply.

The legumes are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. [DynaSeed LegumeMaxx](#) demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ High energy densities through late and medium Perennial ryegrasses
- ✓ Suitable for new sowings and overseeding
- ✓ With herbs like plantain and chicory
- ✓ High protein content

Components

| | |
|------|--|
| 31% | Lolium perenne (late) Sherlock, Valerio |
| 30% | Lolium perenne (intermediate) AstonHockey, Euroconquest |
| 20% | Trifolium pratense Harmonie, Milvus, Taifun |
| 10% | Phleum pratense Lischka |
| 7% | Trifolium repens Bianca, Liflex |
| 1.5% | Cichorium intybus |
| 0.5% | Plantago lanceolata |

Sowing pattern

New sowing, Overseeding, Overseed

Cultivation notes

| | |
|-------------------------------------|---------------|
| New sowing | 40 kg/ha |
| Overseeding | 20 - 25 kg/ha |
| Overseeding, several times per year | 7 - 10 kg/ha |
| Undersowing | 7 - 10 kg/ha |
| Usage per year | 4 - 6 |

All organic mixtures are produced with 100 % organic content in accordance with the EU Organic Farming Regulation 2018/848. For mixtures with at least 70% organic content, the farmer must obtain approval from his inspection body for the use of the conventional content before sowing, starting with production in January 2022.

We aim to use at least 2 varieties per ripening group for mix proportions of more than 20 % of one species and for perennial ryegrass. The choice of varieties may vary depending on production. If individual species or varieties are not available, they are replaced by equivalent ones. The seed strengths are calculated for an optimal seedbed; in case of poor external conditions - such as insufficient seedbed, late sowing date, insufficient nutrient supply and unfavourable weather - the seed strengths should be adjusted upwards.

All information, recommendations and representations contained herein are made to the best of our knowledge and belief, but without guarantee of completeness or accuracy. We cannot guarantee that the properties described are repeatable. All information is provided as an aid to decision-making. Deutsche Saatveredelung AG will not be held liable for any damage or claims for damages resulting from the use of the variety specified in this description. Mixtures may vary if individual varieties are not available. Status 12/2024. Subject to change without prior notice.
