

COUNTRY GRASSLAND 2463 ORGANIC

Overseeding dry sites

Profile

Due to the balanced composition of species and their maturity groups, this mixture ensures optimal utilization of winter moisture and thus puts the focus on the 1st cut. The use of Festulolium increases the drought tolerance of the mixture, resulting in improved yield potential. Perennial ryegrass and Festulolium are ideal for reseeding due to rapid youth development and competitive vigor.

The white clover seeds are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. [DynaSeed LegumeMaxx](#) demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ Drought-tolerant Festulolium
- ✓ Exploitation of winter moisture
- ✓ Emphasis on first cut

Components

30%	Lolium perenne (early) Karatos , Mirtello
23%	Lolium perenne (intermediate) AstonHockey
20%	Lolium perenne (late) Sherlock
20%	Festulolium Fedoro
7%	Trifolium repens Bianca , Liflex

Sowing pattern

New sowing, Overseeding, Overseed

Locations

Cultivation notes

New sowing	35 - 40 kg/ha	
Overseeding	20 - 25 kg/ha	
Overseeding, several times per year	7 - 10 kg/ha	
Sowing time	from March to September	
Usage per year	3 - 6	

All organic mixtures are produced with 100 % organic content, if possible, in accordance with the EU Organic Farming Regulation 2018/848. For mixtures with at least 70% organic content, the farmer must obtain approval from his inspection body for the use of the conventional content before sowing, starting with production in January 2022. We aim to use at least 2 varieties per ripening group for mix proportions of more than 20 % of one species and for German ryegrass. The choice of varieties may vary depending on production. If individual species or varieties are not available, they are replaced by equivalent ones. The seed strengths are calculated for an optimal seedbed; in case of poor external conditions - such as insufficient seedbed, late sowing date, insufficient nutrient supply and unfavourable weather - the seed strengths should be adjusted upwards.

All information, recommendations and representations contained herein are made to the best of our knowledge and belief, but without guarantee of completeness or accuracy. We cannot guarantee that the properties described are repeatable. All information is provided as an aid to decision-making. Deutsche Saatveredelung AG will not be held liable for any damage or claims for damages resulting from the use of the variety specified in this description. Mixtures may vary if individual varieties are not available. Status 12/2024. Subject to change without prior notice.
