

TERRALIFE® - AQUAPRO

For water protection areas and oilseed rape rotations

Profile

The legume- and crucifer-free mix AquaPro was developed specifically for water protection areas. It protects mineralised nitrogen from leaching. Species like niger or phacelia produce lots of biomass, shade the soil well and thus have a very good weed suppression. Additionally, AquaPro offers very good erosion protection and improves the soil biology.

- ✓ Ideal for rapeseed crop rotations
- ✓ Tolerates dry conditions
- ✓ Very good nitrogen storage

Components

0%	Legumes
0%	Cruciferous
Bristle oat, Sorghum, Niger, Linseed, Phacelia, Sunflower	
Seed shares (%)	

Sowing pattern

blank seed, mulch sowing, direct sowing, spreader device on tillage implement, drone

Crop rotations

Oilseed rape, Legumes, Sugar beet, Cereals, Maize

Cultivation notes

Sowing rate	25 - 30 kg/ha
Sowing time	from end of July to 25. August
Usage	Cover crop, green fertilization, summer intercrop, winter intercrop, early sowing
