

TERRALIFE® - AQUAPRO

For water protection areas and oilseed rape rotations

Profile

The legume- and crucifer-free mix AquaPro was developed specifically for water protection areas. It protects mineralised nitrogen from leaching. Species like niger or phacelia produce lots of biomass, shade the soil well and thus have a very good weed suppression. Additionally, AquaPro offers very good erosion protection and improves the soil biology.

- ✓ Very good nitrogen storage capacity
- ✓ Tolerates dry conditions
- ✓ Ideal for oilseed rape crop rotations

Components

0%	Legumes
0%	Cruciferous
	Niger, Phacelia, Linseed, Bristle oat, Sorghum, Sunflower

Seed shares (%)

Sowing pattern

blank seed, mulch sowing, direct sowing, spreader device on tillage implement, scattered seed, drone

Crop rotations

Oilseed rape, Legumes, Sugar beet, Cereals, Maize

Cultivation notes

Sowing rate	25 - 30 kg/ha
Sowing time	from end of July to end of August
Usage	Cover crop, green fertilization, summer intercrop, winter intercrop, early sowing
