

# TERRALIFE® - BETAMAXX 30

The cover crop mix for sugar beet cultivation

## Profile

TerraLife® BetaMaxx creates the ideal preconditions for successful sugar beet cultivation. The mix includes deep-rooting species, that create deep channels allowing an easy root penetration for the following beets. This helps the beets to overcome dry periods. The successful establishment of sugar beets requires a fine seedbed. TerraLife® BetaMaxx leaves fine organic matter and an excellent soil structure. Thus, beet cultivation per reduced tillage or no-till management is possible.

TerraLife® BetaMaxx is unsuitable for the biological control of *Heterodera schachtii* (at this point we advise the use of TerraLife® BetaSola).

- ✓ Freezes off very well
- ✓ Creates ideal seedbed conditions for sugar beet
- ✓ Also for rapeseed crop rotations

N-Potential approx. 60 kg/ha

## Components

24%	Legumes
0%	Cruciferous
Blue lupin, Bristle oat, Niger, Field pea, Common vetch, Egyptian clover, Phacelia, Linseed, Serradella	
Seed shares (%)	

## Sowing pattern

blank seed, mulch sowing, direct sowing, spreader device on tillage implement, drone

## Crop rotations

Oilseed rape, Sugar beet, Cereals, Maize

## Cultivation notes

<b>Sowing rate</b>	40 - 45 kg/ha
<b>Sowing time</b>	from middle of July to 25. August
<b>Usage</b>	Cover crop, green fertilization, summer intercrop, winter intercrop, normal sowing time, N-Potential: approx. 60 kg/ha, medium to low proportion of legumes
