

TERRALIFE® - CEREALPRO

Species-rich admixture and undersowing mixture for cereal crop rotations

Profile

CerealPro brings species richness to cereal growth. The balanced mixing ratio prevents competition with each other and at the same time stimulates soil life in an extremely diverse way. After the cereal harvest, some of the species are retained and are then an ideal winter cover crop. The intelligent site coverage ensures good weed suppression.

- ✓ Low competition with cereals
- ✓ Intense rooting
- ✓ Diverse composition

Components

41.4%

Legumes

Lolium perenne, Trifolium repens, Crimson clover, Lotus corniculatus, Plantago lanceolata, Falseflax, Linseed, Phacelia

Seed shares (%)

Sowing pattern

blank seed, mulch sowing, direct sowing, drone, spreader device on tillage implement

Crop rotations

Cereals

Cultivation notes

Sowing rate

10 kg/ha

Sowing time

from March to April

Usage

co-seeding, undersowing mix for cereals, normal sowing time, medium to low proportion of legumes
