

ZORRO

CRIMSON CLOVER

Suitable for later sowing

Profile

ZORRO is an overwintering crimson clover with many uses (cover crop, fallow, forage). ZORRO is characterised by its early flowering, excellent youth development and high biomass production. Its flowers are highly attractive to bees and further beneficial insects as well as its legume-characteristics contribute to efficient nitrogen fixation.

National listing/Official recommendation: BY, SK

Sowing rate: 25-30 kg/ha

- Excellent youth development
- Early flowering
- Long plant length
- Very good bee pasture

General

Green fertilizer

Used as fodder

Grazing

Sowing

25 - 30 kg/ha

Sowing date

Beginning of July to end of August
