

TERRALIFE® - HUMUSPLUS 2.1

Mixture for rotational fallow with low green mass growth

Previous M2

Profile

Clover-grass mixtures have proven to be ideal for a high preceding crop effect after green fallow. In this mixture, late perennial ryegrass is combined with white clover in such a way that a slow-growing but dense, well-rooted sward is created. This suppresses weeds and thus effectively prevents weed infestation of the areas.

- Fast ground coverage
- Efficient weed suppression
- High rooting performance

Components

Lolium perenne

Trifolium repens

Sowing pattern

blank seed, mulch sowing, direct sowing, spreader device on tillage implement, scattered seed, drone

Crop rotations

Oilseed rape, Cereals, Maize

Cultivation notes

Undersowing	15 kg/ha	
Sowing time	from middle of August to middle of September	
	from middle of February to middle of March	
Usage	Green fallow mixture, Undersowing mix, undersowing mix for corn, undersowing mix for cereals, green fertilization, winter resistant, medium to low proportion of legumes
