

## TERRALIFE® - HUMUSPLUS 2.1

### Mixture for rotational fallow with low green mass growth

Previous M2

#### Profile

Clover-grass mixtures have proven to be ideal for a high preceding crop effect after green fallow. In this mixture, late perennial ryegrass is combined with white clover in such a way that a slow-growing but dense, well-rooted sward is created. This suppresses weeds and thus effectively prevents weed infestation of the areas.

- Fast ground coverage
- Efficient weed suppression
- High rooting performance

#### Components

Lolium perenne

Trifolium repens

#### Sowing pattern

blank seed, mulch sowing, direct sowing, spreader device on tillage implement, scattered seed, drone

#### Crop rotations

Oilseed rape, Cereals, Maize

## Cultivation notes

<b>Sowing time</b>	from middle of August to middle of September
	from middle of February to middle of March
<b>Usage</b>	Green fallow mixture, Undersowing mix, undersowing mix for corn, undersowing mix for cereals, green fertilization, winter resistant, medium to low proportion of legumes
