

TERRALIFE® - ZEAPRO

The grass-free solution for species-rich maize undersowing

Profile

With predominantly hardy species, ZeaPro offers optimum erosion protection and promotes soil life in the long term. This mixture stabilises the soil structure and ensures efficient winter greening after maize cultivation. Ribwort plantain provides a hardy, deep-rooted cover crop during and after corn cultivation. Its nitrification-inhibiting effect protects valuable ammonium from conversion into nitrate and subsequent leaching.

- ✓ Grass-free, partly hardy mixture formulation
- ✓ Shade-tolerant species, perfect for undersowing corn
- ✓ Ideally matched combination of legumes and non-legumes

Components

26.7%	Legumes
40.3%	Cruciferous
	Falseflax, Linseed, Crimson clover, Plantago lanceolata, Sparrose clover, Vicia pannonica
Seed shares (%)	

Crop rotations

Maize, Potatoes, Cereals

Cultivation notes

Sowing rate	30 - 35 kg/ha
Sowing time	from end of August to middle of September
Usage	Cover crop, Undersowing mix, co-seeding, undersowing mix for corn, Green fallow mixture
