

CLIPPERTON

ca. S 220

The high-rewarding choice

Profile

Clipperton is an early, highly productive silage maize. The variety was registered in the Netherlands and is also recommended for cultivation there. Its high yield, combined with early maturity and good feed quality, makes it interesting for early growing regions or as a second crop following Landsberger mixture, green rye, or Italian ryegrass.

- High biomass yield
- High energy yield
- Early flowering

General

Usage	
Silo maturity	early
Maturity forage	ca. 220
Type of grain	intermediate
Sowing date	early | late

Breeder classification: +++ = very good / very high | ++ = good / high | + = medium

Resistance to diseases

Maize smut	+ ○ ○
Helminthosporium	+ ○ ○

Location

Soil type	heavy | light
Humidity	wet | dry

Sowing

Forage	7 - 9 Plants/m²
