

## **Profile**

Clipperton is an early, highly productive silage maize. The variety was registered in the Netherlands and is also recommended for cultivation there. Its high yield, combined with early maturity and good feed quality, makes it interesting for early growing regions or as a second crop following Landsberger mixture, green rye, or Italian ryegrass.

- ✓ High biomass yield
- ✓ High energy yield
- ✓ Early flowering

## General

Usage	
Silo maturity	early
Maturity forage	ca. 220
Type of grain	intermediate
Sowing date	early 0 late
Breeder classification: +++ = very good	I / very high   ++ = good / high   + = medium
Resistance to diseases  Maize smut	
Helminthosporium	•
ocation	
Soil type	heavy 0 light
Humidity	

## Sowing

Forage

7 - 9 Plants/m<sup>2</sup>
