

## RADETZKY

Oil radish

### Combines four resistances

### Profile

RADETZKY combines four nematode resistances in one variety: resistance against *Heterodera schachtii*, and resistance against *Meloidogyne chitwoodi*, *Meloidogyne fallax* and *Meloidogyne minor*. The excellent nematode resistance of this variety is combined with a low flowering tendency and a very low to low tendency for lodging. It is the ideal cover crop for beet, potato and vegetable cultivation.

- ✓ Multi-resistant variety for beet, potato and vegetable cultivation
- ✓ Excellent standing ability
- ✓ Low risk of seed setting and volunteer seeds

### Agronomic properties

Early growth development

medium

### Tends to

Flowering

low

Lodging

very low to low

## Vulnerabilities

Beet cyst nematodes

very low to low

Classification according to the descriptive variety list - Bundessortenamt (federal plant variety office, Germany) 2025 and our own results.

## Special characteristics

Nematode resistance grade 2, resistance against *Meloidogyne chitwoodi*

## Sowing

25 - 30 kg/ha

## Sowing date

Mid of July to end of August

## Usage

Green manuring and nematode control
