

LITEMBER

Mustard

Quick soil coverage

Profile

LITEMBER grows rapidly and flowers earlier than other mustard varieties. This enables weeds and volunteer cereals to be effectively suppressed, even when sown later in the season. Furthermore, thanks to its well-developed root system, LITEMBER can be more tolerant of dry periods.

- Fast growing and weed-suppressing
- Medium flowering allows earlier sowing dates
- Rapid development also when sown late

Also available in Organic quality

General

Green fertilizer	✓

Agronomic properties

Early growth development	1 2 3 4 5 6 **7** 8 9	strong

Tends to

Flowering	1 2 3 4 **5** 6 7 8 9	medium
Lodging	1 2 3 **4** 5 6 7 8 9	low to medium

Classification according to the descriptive variety list - Bundessortenamt (federal plant variety office, Germany) 2025 and our own results.

Special characteristics

fast coverage, late sowing, mulch drilling

Sowing

18 - 20 kg/ha

Sowing date

beginning of August to mid September
