

# LITEMBER

Late all-rounder

Mustard

## Profile

The mustard variety LITEMBER tolerates late sowing and offers high organic matter production. LITEMBER is fast-growing, late-flowering and resistant to drought conditions when young. This variety improves soil structure with its distinctively developed root system.

- ✓ Fast-growing with good weed suppression
- ✓ Medium flowering tendency also allows earlier sowing dates
- ✓ Rapid development even with late sowing dates in September

## General

Green fertilizer	✓
------------------	---

Summer intercrop	✓
------------------	---

## Special characteristics

fast coverage, late sowing, mulch drilling

## Sowing

18-20 kg/ha

## Sowing date

late July to mid September

## Usage

green manure, grazing
