

EG PRO 260 AUTUMN RESTORATION

EUROGRASS Pro Garden & Green

A research-based autumn lawn repair mixture designed for fast establishment and cold tolerance

Profile

Fall is a good time to repair a lawn that has been stressed over the summer and prepare it for winter. This mixture is specially adapted to this task by using robust grass species that germinate quickly and establish themselves before winter. This is based on the latest DSV research into the cold germination of lawn grasses. The robust varieties are cold-resistant and adapt well to changing weather conditions. Use the golden time of autumn to prepare your garden for the coming season!

- Specially developed for lawn repair and □renovation in autumn
- Ideal for lawns stressed by summer heat and drought
- Contains robust grass species with fast germination
- Features cold-resistant and resilient varieties
- Adapts well to changing and unstable weather conditions
- Supports a healthy, strong lawn for the following season

Components

32%	Lolium perenne Pollen
24%	Lolium perenne Eurocool
23%	Lolium perenne Tetrasport
21%	Lolium multiflorum Cairo
