

EG PRO 323 REGENERATION WITH POA

EUROGRASS Pro Sport

A high-performance repair and regeneration mixture that enhances stressed sports turf by combining quick recovery with the long-term resilience of bluegrass

RSM 3.2

Profile

Repair and regeneration mixture for particularly stressed sports surfaces. Here, the regeneration is supplemented by bluegrass, which has the corresponding resilience, which distinguishes this mixture from pure repair mixtures made from ryegrass varieties. The result of significantly increased resilience and endurance, in which this mixture strengthens and improves the old sward, allows the slow development of the bluegrass to fade into the background.

- Combines repair and long-term regeneration in one mixture
- Supplemented with bluegrass for enhanced resilience and endurance
- Offers greater durability than pure ryegrass repair mixtures
- Ideal for sports fields requiring long-lasting performance

Components

40%	Lolium perenne Beckham
40%	Lolium perenne Turfsun
10%	Poa pratensis Limousine
10%	Poa pratensis Zeptor
