

EG PRO 711 SCENICGREEN

EUROGRASS Pro Landscaping

A resilient, low-input grass mixture for dry sites

RSM 7.1

Profile

The mixture is characterized by a robust and resistant structure in terms of nutrient and water requirements. It is suitable for extremely dry locations such as south-facing embankments. The main areas of application are extensive and/or manicured areas in public and private green spaces. The maintenance requirements are low; this mixture does well with just a few cuts per year (0-3). Reduced cutting intensity promotes the proportion of herbs in the stand.

- Features a robust and resilient structure
- Low nutrient and water requirements
- Suitable for extensive and semi-manicured areas
- Promotes a natural, diverse, and sustainable vegetation cover

Components

35%	Festuca trachyphylla Negev
25%	Festa rubra commutata Joanna
15%	Festuca rubra rubra Record
10%	Festuca rubra trichophylla Nicole
5%	Lolium perenne Turfdreamer
5%	Poa pratensis Zeptor
5%	Agrostis castellana Highland
