

EG PRO 770 ECOAIR

EUROGRASS Pro Landscaping

A specialised airfield grass mixture designed to deter birds

Profile

This specially developed grass mixture consists of tough grasses with stiff, pointed leaves that make it difficult for birds to land and stay on the turf. The unpleasant structure of the blades makes the airfield unattractive to birds, significantly reducing the risk of bird strikes. At the same time, the mix provides a dense, low-maintenance turf that meets the requirements for load-bearing capacity, erosion control and weather resistance.

- Specially developed for airfields and aviation areas
- Contains tough grasses with stiff, pointed leaves
- Reduces attractiveness of the area to birds
- Helps minimise the risk of bird strikes
- Low-maintenance and cost-efficient to manage

Components

50%	Festuca arundinacea Rosparon
35%	Festuca arundinacea Manitou
15%	Lolium perenne Tacita
