

LIGENA

Falseflax

Great adaptability to different conditions

Profile

LIGENA is DSV's Camelina variety that is both suitable for cover crop and seed production use. Due to its rapid growth and rooting habits as well as its early to medium flowering characteristics, LIGENA is especially suitable for later cover crop sowing dates. Its undemanding growth habits make LIGENA a favourable variety for Camelina seed production.

- Undemanding and drought tolerant
- Low susceptibility to diseases
- Good weed suppression
