

TERRALIFE® - BETAMAXX DT

The cover crop mix for sugar beet cultivation

Profile

TerraLife®-BetaMaxx DT is a species-rich cover crop mixture developed for use prior to the cultivation of sugar beet. It contains deep-rooting species that promote the subsequent root growth of the beet. Good root development helps the beet plants to withstand dry spells. BetaMaxx DT contains deep-rooted radish, which penetrates the soil particularly deeply and promotes nutrient uptake by the cover crop stand.

TerraLife®-BetaMaxx DT is not suitable for the biological control of Heterodera schachtii (in this case, we recommend TerraLife®-BetaSola).

- With deep-rooted radish
- Promotes diverse rooting and nutrient uptake
- Targets beet and vegetable cultivation

N-Potential approx. 30 kg/ha

Components

18.4%	Legumes
12.8%	Cruciferous
	Niger, Phacelia, Bristle oat, Serradella, Abyssinian cabbage, Linseed, Egyptian clover, Deep-rooted radish, Common vetch, Field pea

Seed shares (%)

Sowing pattern

	blank seed, mulch sowing, direct sowing, spreader device on tillage implement, drone

Crop rotations

Sugar beet, Oilseed rape *, Cereals, Maize

* Observe crop rotation diseases.

Cultivation notes

Sowing rate	30 - 35 kg/ha
Sowing time	from middle of July to end of August
Usage	Cover crop, green fertilization, normal sowing time, Grazing, N-Potential: approx. 30 kg/ha, medium to low proportion of legumes
