

TERRALIFE® - BETAMAXX DT

The cover crop mix for sugar beet cultivation

Profile

BetaMaxx DT creates the ideal preconditions for successful sugar beet cultivation. The mix includes deep-rooting species, that create deep channels allowing an easy root penetration for the following beets. This helps the beets to overcome dry periods. BetaMaxx allows beet cultivation per reduced tillage or no-till management. TerraLife® BetaMaxx is unsuitable for the biological control of *Heterodera schachtii* (in this case, we refer to TerraLife® BetaSola).

BetaMaxx DT is not suitable for close beet crop rotations with nematodes!

- ✓ With DeepTill radish
- ✓ Creates ideal seedbed conditions for sugar beet
- ✓ Freezes off very well

N-Potential approx. 30 kg/ha

Components

18.4%	Legumes
12.8%	Cruciferous
Bristle oat, Field pea, Common vetch, Niger, Deep-rooted radish, Phacelia, Linseed, Serradella, Abyssinian cabbage, Egyptian clover	
Seed shares (%)	

Sowing pattern

blank seed, mulch sowing, direct sowing, spreader device on tillage implement, drone

Crop rotations

Sugar beet, Cereals, Maize, Oilseed rape *

* Observe crop rotation diseases.

Cultivation notes

Sowing rate	30 - 35 kg/ha
Sowing time	from middle of July to 25. August
Usage	Cover crop, green fertilization, Extensive grazing, normal sowing time, N-Potential: approx. 30 kg/ha, medium to low proportion of legumes
