

TERRALIFE® - N-FIXX 50

Rapid soil coverage and nitrogen fixation

Profile

N-Fixx 50 is an excellent cover crop mixture for maize for winter cereal crop rotations. The mixture is very unlikely to shoot and thus suitable for early sowing dates. Its frost-sensitive components guarantee easy incorporation after winter. Deep-rooting species leave a solid soil structure and a lot of organic matter.

The mixture's legume share is below 50 %.

- ✓ Freezes off very well
- ✓ Very good nitrogen accumulation
- ✓ Rich bee forage

N-Potential approx. 80 kg/ha
