

TERRALIFE® - MAIZEPRO DT 30

Balanced, partly hardy cover crop for maize crop rotations

Profile

MaizePro DT 30 selectively supports the formation of mycorrhiza and improves the soil structure. The intensive root penetration creates new root channels, which help the maize particularly during periods of drought. The hardy components guarantee erosion protection right into spring. After a successful cover crop, the soil only requires working to a depth of the soil horizon receiving the maize seed. In this way, the capillarity is maintained, ensuring water availability for germination. Also suitable for sowing flowering buffer strips.

The legume content is below 30 %.

- Promotes ideal soil structure
- Enhances deep rooting
- Excellent N effciency
- Partly winterhard

N-Potential approx. 60 kg/ha

Components

29%	Legumes
11.1%	Cruciferous
	Niger, Phacelia, Trifolium repens, Linseed, Persian clover, Abyssinian cabbage, Trifolium pratense, Sorghum, Serradella, Deep-rooted radish, Sunflower, Field bean, Common vetch, Field pea

Seed shares (%)

Sowing pattern

	blank seed, mulch sowing, direct sowing, spreader device on tillage implement, drone

Crop rotations

Cereals, Maize, Oilseed rape *

* Observe crop rotation diseases.

Cultivation notes

Sowing rate	30 - 35 kg/ha	
Sowing time	from middle of July to end of August	
Usage	Green fallow mixture, Cover crop, summer intercrop, winter intercrop, green fertilization, normal sowing time, N-Potential: approx. 60 kg/ha, medium to low proportion of legumes
