

TERRALIFE® - SOLARIGOL

The cover crop mix for potato crop rotations

Profile

SolaRigol is a balanced cover crop mixture specially formulated for potato cultivation. Its diverse composition of plant species is designed to promote an active soil microbiome. The heterogeneous root system helps to improve the soil's water infiltration capacity and gas exchange. In this way, the soil is well prepared for ridge cultivation. Blue lupin helps to reduce infestation with tobacco rattle virus (TRV), whilst common vetch is intended to combat potato scab. The mixture contains no brassicas and is therefore also suitable for use in rapeseed crop rotations.

With multi-resistant oil radish: TerraLife®-SolaRigol R

- Targets a healthy soil microbiome for potato cultivation
- Freezing-off mixture composition
- Also suitable for oilseed rape crop rotations

N-Potential approx. 80 kg/ha

Components

39%	Legumes
0%	Cruciferous
	Niger, Linseed, Squarrose clover, Egyptian clover, Bristle oat, Blue lupin, Common vetch, Serradella, Field pea

Seed shares (%)

Sowing pattern

	blank seed, mulch sowing, direct sowing, spreader device on tillage implement, drone

Crop rotations

Potatoes, Oilseed rape, Cereals, Maize, Sugar beet

Cultivation notes

Sowing rate	55 - 60 kg/ha
Sowing time	from middle of July to middle of August
Usage	Cover crop, summer intercrop, normal sowing time, N-Potential: approx. 80 kg/ha
