

TERRALIFE® - SOLARIGOL R

The cover crop mix for potato crop rotations

Profile

SolaRigol R is a balanced cover crop mixture specially formulated for potato cultivation. Its diverse species composition is designed to promote an active soil microbiome. The heterogeneous root system helps to improve the soil's water infiltration capacity and gas exchange. In this way, the soil is well prepared for ridge cultivation. Blue lupin helps to reduce infestation with tobacco rattle virus (TRV), whilst common vetch is intended to combat potato scab. In addition, SolaRigol R contains multi-resistant oil radish, which reduces infestation with root-knot nematodes.

- Including multi-resistant oil radish
- Targets a healthy soil microbiome for potato cultivation
- High legume share

N-Potential approx. 30 kg/ha

Components

66.9%	Legumes
15.9%	Cruciferous
	Persian clover, Egyptian clover, Niger, Oil radish, Common vetch, Field pea, Blue lupin

Seed shares (%)

Sowing pattern

	blank seed, mulch sowing, direct sowing, spreader device on tillage implement, drone

Crop rotations

Potatoes, Oilseed rape, Cereals, Maize, Sugar beet

Cultivation notes

Sowing rate	55 - 60 kg/ha
Sowing time	from middle of July to middle of August
Usage	Cover crop, normal sowing time, summer intercrop, N-Potential: approx. 30 kg/ha, leguminous
