

TERRALIFE® - RIGOL DT

Strong root formation stabilises the soil structure

Profile

As one of the first TerraLife® mixtures, Rigol DT has been proving its worth in agricultural practice for over a decade. It provides a diverse combination of deep- and shallow-rooted species. In this way, Rigol DT promotes a fertile, well-rooted topsoil that can provide a secure food source for soil life and the main crop. At the same time, the mixture develops lush above-ground biomass, which helps to suppress weeds and volunteer cereals.

- Intensive and deep rooting
- Proven in practice over the long term
- Ideal before maize and in cereal crop rotations

N-Potential approx. 30 kg/ha

Components

10.5%	Legumes
31.6%	Cruciferous
	Falseflax, Bristle oat, Phacelia, Niger, Linseed, Egyptian clover, Deep-rooted radish, Sorghum, Abyssinian cabbage, Common vetch, Field pea, Sunflower

Seed shares (%)

Sowing pattern

	blank seed, mulch sowing, direct sowing, spreader device on tillage implement, scattered seed, drone

Crop rotations

Cereals, Maize

Cultivation notes

Sowing rate	20 - 22 kg/ha	
Sowing time	from end of July to end of August	
Usage	Cover crop, summer intercrop, green fertilization, normal sowing time, N-Potential: approx. 30 kg/ha, medium to low proportion of legumes
