# TERRALIFE® - RIGOL DT

## Strong root formation stabilises the soil structure

## Profile

The cover crop mixture Rigol DT is extremely effective in penetrating soil compaction, as the plant species it contains have an intensive root performance. Numerous root channels are created, which can be utilised by the following crop for rapid root penetration. At the same time, Rigol TR ensures good soil shading and rapid fine rooting of the A horizon as well as good above-ground biomass production. The proportion of legumes leads to good humus and nutrient accumulation. The favourable C/N ratio allows rapid N availability for the subsequent crop. Rigol DT is one of the oldest TerraLife® mixtures and has proven itself over many years.

✓ Proven in practice over the long term

✓ Very deep rooting

✓ For compacted soils

N-Potential approx. 30 kg/ha

## Components

| | |
|---|---|
| **31.6%** | Cruciferous |
| **10.5%** | Legumes |
| | Falseflax, Bristle oat, Phacelia, Niger, Linseed, Egyptian clover, Deep-rooted radish, Sorghum, Abyssinian cabbage, Common vetch, Field pea, Sunflower |

Seed shares (%)

## Sowing pattern

blank seed, mulch sowing, direct sowing, spreader device on tillage implement, scattered seed, drone

DSV

## Crop rotations

Cereals, Maize, Oilseed rape *

* Observe crop rotation diseases.

## Cultivation notes

| | |
|---|---|
| **Sowing rate** | 20 - 22 kg/ha |
| **Sowing time** | from middle of July to beginning of September |
| **Usage** | Cover crop, summer intercrop, green fertilization, normal sowing time, N-Potential: approx. 30 kg/ha, medium to low proportion of legumes |
