

TERRALIFE® - VITAMAXX DT

Fast growing mix for intensive livestock farms

Profile

VitaMaxx DT is a fast-growing, legume-free cover crop mix and is therefore very suitable for use in water protection areas. The mix produces plenty of biomass, which serves as a long-term food source for earthworms and other soil inhabitants and preserves the nutrients over winter. Due to fast growing species the mixture is suitable for late sowing dates. Apart from common planting, this mixture can also be broadcasted.

- ✓ Suitable for late sowing
- ✓ Good nitrogen and phosphorus storage
- ✓ Intensive biomass production and weed suppression

Components

0%	Legumes
41.4%	Cruciferous
	Bristle oat, Fagopyrum tataricum, Niger, Mustard, Linseed, Falseflax, Abyssinian cabbage, Phacelia, Deep-rooted radish, Sunflower
Seed shares (%)	

Sowing pattern

blank seed, mulch sowing, direct sowing, spreader device on tillage implement, scattered seed, drone

Crop rotations

Legumes, Cereals, Maize

Cultivation notes

Sowing rate	20 - 25 kg/ha
Sowing time	from 25. August to middle of September
Usage	Cover crop, summer intercrop, green fertilization, late sowing, very late sowing
