

COUNTRY G 2015

Permanent meadow for dry sites

Mixture for extensive meadows on dry sites with white clover

Profile

Festuca pratensis, *Festuca rubra rubra* and *Phleum pratense* provide good winter hardiness and persistency to this mixture. *Festuca rubra rubra* and *Poa pratensis* close gaps in the sward due to rhizome development. *Trifolium pratense* and *Trifolium repens* increase palatability, protein yield and N-fixation.

The legumes are treated with DSV's DynaSeed LegumeMaxx, which contains among others species-specific bacteria. [DynaSeed LegumeMaxx](#) demonstrably and significantly improves nitrogen fixation, root development, and thus yield.

- ✓ Robust and dense sward
- ✓ Clovers for N-fixation
