

PRESTO

Phleum pratense

Profile

Very high yields under conservation management and under high simulated grazing are the main characteristics of PRESTO. These outstanding results are connected with a very good early spring growth and a high quality. Other arguments for PRESTO are a very good winter hardiness and a high sward density.

Sowing rate: 15 kg/ha

International listings/recommendations: BY, CA, DK, FR, LU, NL, UA, UK

- Milk Index variety
- combination of high yields with great forage quality
- rapid early growth development
