ROSCATI

Festuca arundinacea

Profile

ROSCATI originates from the new DSV tall fescue breeding and is one of DSV's first soft-leaved tall fescue varieties. The special soft-leafiness of ROSCATI increases the acceptance of cattle on pasture. Moreover, the variety shows a good dry matter yield, good health and very good winter hardiness.

National listing/Official recommendation:
BY, CA, DE, FR

Sowing rate: 30-35 kg/ha

- ✓ Soft-leaved
- ✓ very good winter hardiness
- ✓ low susceptibility to rust

Suitability

Maturity	inter

Yield characteristics

Dry matter yield total		medium
Dry matter yield - 1st cut		medium
Dry matter yield - further cuts		medium to high

Plant stand development

Early growth development		medium to strong
Susceptibility to winter damage		medium
Sward density		medium

Healthiness

Susceptibility to rust

low

Classification according to the descriptive variety list - Bundessortenamt (federal plant variety office, Germany) 2024 and our own results.
