

POWER-STARCH-MIX

Mixture of starch-rich dual types

Sorghum-Mixture

Profile

Sorghum bicolor / DUAL-type

Two starch-rich dual sorghum types are combined in this mixture, being suitable for the feeding of cattle and dairy cattle (starch content up to 30 %).

Early maturing, grain-focused DUAL sorghum types with heights of 1.80 to 2.50 m have been developed by DSV.

Due to their high fodder value, the combination of several DUAL-hybrids is attractive for cow feeding.
The mixture is a great supplement or substitute for maize silage due to its high dry matter yield and high starch content.

- Efficient water and nutrient absorbtion
- High starch content
- Good forage quality
- Drought tolerance
- Very early maturing
- Medium tall plant

Cultivation notes

Sowing rate	Sowing depth: 2-4 cm
Sowing time	from middle of May to middle of June
