

AXEL

The all-rounder with 00-quality

Winter forage rape

Profile

AXEL is a leafy forage rape which is especially suitable for grazing but also for cutting. Due to its good taste, high leaf content as well as fine and short stems, the variety is popular as a forage rape. Furthermore, AXEL shows as pre-crop a very good green manure effect because of the intensive rooting. It has an outstanding weed suppressing effect combined with a low tendency to flowering. AXEL is characterised by 00-quality, this means it is free of erucic acid and has a low content of glucosinolates. Its early sowing tolerance and very good winter hardiness make AXEL an interesting variety for cultivation.

- ✓ 00-quality - free of erucic acid and low content of glucosinolates
- ✓ very high leaf content
- ✓ early sowing tolerance

General

Suitable for biogas	✓
Green fertilizer	✓
Use as fodder	✓
Cutting	✓
Grazing	✓
Summer intercrop	✓
Winter intercrop	✓

Sowing

Forage use: 8-12 kg/ha,

Green manure: 12-15 kg/ha

Sowing date

Forage use: Mid-July to early September;

Green manure: Mid-August to early September

Fertilization

Forage us: 80-100 kg N/ha,

Green manure: 30-40 kg N/ha
